Keeping up with the events within the space :

I've made this forum post to inform the other members about this fully functional Integration which I've built to help facilitate the coordination between important spaces within the ApeVerse and the Members who'd love to contribute more towards the discussion over there.

It's increasingly harder and harder to keep up with all the spaces and discussions happening across soo many channels, so if you're like me and need some help in this regard then you are at the right place.

Summaries are the best way you can keep up with all the new updates within the fold, we condense all that infomation into byte sized content which you can consume within minutes while gathering as much context as it can.

What can you access with this ? → Summary, Diarized Transcriptions, Agenda / TLDR, Archive of audio file and much more. Adding more functionality as we speak.

Before going forward, I'm gonna define a few terms :

Diarization (DZ) → Basically, who spoke what and when. Helps to add additional context to spoken data

ASR → Automated speech recognition

Now when I Talk about Transcription or Transcripts, assume I am talking about Diarized content

Here's how you do it →

Simply add this as a subscription calendar to a device of your choice.

Link to the Subscription Calendar → https://airtable.com/appH9mdzUItBYxQwf/shrUtJl4ZcZifz7dy/iCal?timeZone=Asia%2FCalcutta&userLocale=en-gb

For iOS :

1. Open Calendar

2. Click on calendars on the Bottom middle part of the screen

3. Select 'Add Calendar' -> Subscription Calender

4. Add in Airtable link and click Subscribe

5. Boom, That's all

Step 1 → Add

Step 3 → It's all done, now all you gotta do is click on the particular event you wanna access

[

image

1284×2778 265 KB

](https://global.discourse-cdn.com/apecoin/original/2X/e/e388d6f1a2d3038f31e42dee34a3992f3c1bbd8e.png)

Example : You clicked on the Special Council Debrief #50

(it's still live atm so I was unable to process it, hence I'll take another as an example)

[

image

](https://global.discourse-cdn.com/apecoin/original/2X/0/0c9a625fa39226e44b65b662beb9bb8249912561.png)

You click on the link provided

[

image

1284×2230 173 KB

](https://global.discourse-cdn.com/apecoin/original/2X/9/96eec549f2e1e65abe68d4c505ee0c0021fccb3e.png)

The fields are empty cause the space was live when I was posting this

Now seeing an example which has some content :

[

image

1920×1106 118 KB

](https://global.discourse-cdn.com/apecoin/original/2X/7/7fb403bd55d6ce23ceb9656351159a355b0b290e.jpeg)

The archive of the 5 hour spaces recording is embedded directly into it. It also has the TLDR / Agenda, the Summary and The Diarized Transcripts

For Google :

1) Go to → https://calendar.google.com/

2) Click on Other Calendars

3) Select From URL

4) Add the link to the subscription calendar given above

5) Add in the link → Add Calendar

6) Voila �¤ That's all Folks !!

For Microsoft :

me omw to tactically acquire a Microsoft device

Link to Outlook → Outlook

Here's the Process :heart:

1. Go to outlook calendar → Outlook
2. Click on Add Calendar, right above My Calendars.
3. Select "Subscribe from Web"
4. Add in the Airtable URL and click on Import
5. Boom, That's it frens

This is calibrated for my Timezone (+5:30 GMT || +9:30 EST) . Will adjust accordingly to your timezone.

Will add it to a frontend at some point in the future, dunno when but one day. Maybe bully me into it

Why this approach ?

I'm gonna steal my words from before but Sometimes the simplest implementation is also the best implementation.

This was the simplest implementation which would let us modify those records and that being reflected on the calendar itself. This ensures even if schedules change, the people can be notified.

I've done some validation testing and have derived that the changes made to the main db will be replicated within 5 minutes. That's decent enough

This allows the user to stay upto date with all events happening within the ApeVerse and integrate this directly into their existing calendar apps , without having to put in a lot of effort for a custom implementation.

Feel free to build around it, just include a thanks for me :sparkling_heart:

Hope this helps, Bye !!
